

DRAFT (June 3, 2003)

President Bush Launches the Hydrogen Fuel Initiative

"Tonight I am proposing \$1.2 billion in research funding so that America can lead the world in developing clean, hydrogen-powered automobiles."

"A simple chemical reaction between hydrogen and oxygen generates energy, which can be used to power a car producing only water, not exhaust fumes."

"With a new national commitment our scientists and engineers will overcome obstacles to taking these cars from laboratory to showroom so that the first car driven by a child born today could be powered by hydrogen, and pollution free."

"Join me in this important innovation to make our air significantly cleaner, and our country much less dependent on foreign sources of energy."

– 2003 State of the
Union Address
